---

**AstroDock** offers  
professionals and home owners  
the design versatility,  
ease of installation,  
effortless maintenance,  
and enduring beauty for any  
new construction or replacement.

---

# COLOR AND STYLE OPTIONS TO DESIGN THE PERFECT DOCK.

Whether you're building on the lake or on the coast, waterfront home or commercial marina, AstroDock is the ideal solution for your environment. Choose the design, trim, and color option that best suits your needs and you can be assured of years of beautiful, worry-free enjoyment.

## YOUR DOCK STAYS COOL, EVEN ON SCORCHING HOT DAYS.

Summertime on the water is barefoot time, but most composite, wood, and metal docks get too hot in the summer sun, especially for youngsters. AstroDock's combination of high-quality outdoor-grade vinyl and unique profile prevents heat build-up and creates airflow to keep your dock cool.

# ASTRODOCK

## ASTRODOCK<sup>V</sup>

**ASTRODOCK 2x6V** is our “Ventilated” vinyl decking designed specifically for coastal applications where natural light penetration is desired through the dock or boardwalk. The slotted design of our deck boards allows some sun light to reach vegetation beneath the structure, while the open areas also let sand and debris fall through to keep the surface clean. Astro-Dock ventilated decking can even reduce damage from high tides and storm surge.

- Allows sun light and water to pass through
- Safe, Sure-grip embossed tread
- No visible screws or exposed hardware
- No-squeak design offers a quiet dock and solid feel
- Excellent color retention
- Cool to touch, low heat build-up
- Same dimensions as standard 2×6 board (5 ½”w x 1 ½”h)
- 12’, 16’, and 20’ board lengths
- Resistant to rot and insects
- Optional safety yellow inserts

## ASTRODOCK<sup>S</sup>

**ASTRODOCK 2x6S** is a good fit for any deck or marine dock application. Our unique deck board profile allows screws and fasteners to be secured within the board, then covered with snap-in inserts for a clean appearance. Made from a highly weatherable, outdoor grade PVC, this decking will provide a low maintenance surface for your dock or deck. Choose between beige and gray, both of which will remain barefoot comfortable even in direct sun light.

- Strong, rigid design can span 24” joist spacing
- Safe, Sure-grip embossed tread
- No visible screws or exposed hardware
- No-squeak design offers a quiet dock and solid feel
- Excellent color retention
- Cool to touch, low heat build-up
- Same dimensions as standard 2×6 board (5 ½”w x 1 ½”h)
- 12’, 16’, and 20’ board lengths
- Resistant to rot and insects
- Optional safety yellow inserts

COMMERCIAL | RESIDENTIAL | LAKE | COAST

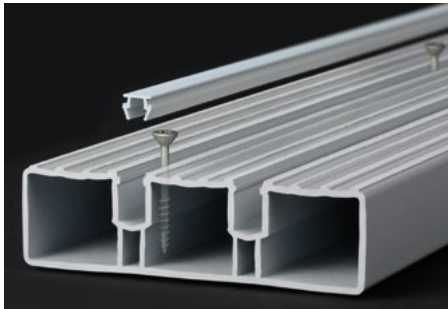

Being on the water is about enjoying the outdoors doing recreational activities, not maintenance and repairs. AstroDock is manufactured with pride in the U.S. and our precision extrusion process ensures all parts arrive in perfect condition, install seamlessly and securely, and looks beautiful year after year without needing sanding, staining, or painting.

## THERE IS NO DECKING EASIER TO BUILD WITH

Our plastic extrusion and design experts engineered AstroDock with professional contractors and discerning consumer's in mind, knowing that it wasn't enough to make our decking as good as the most popular product, it had to be better — for dock builders and their customers.

Other decking products might be made from similar materials, but AstroDock offers the most flexible design options for new dock construction and replacements, because we made it the same dimensions as standard 2"x 6" deck boards and standard lengths. It's easy to cut and attach to existing joists spanning up to 24". Simple snap-in inserts cover the fasteners and both styles of edging attach securely with a few screws.

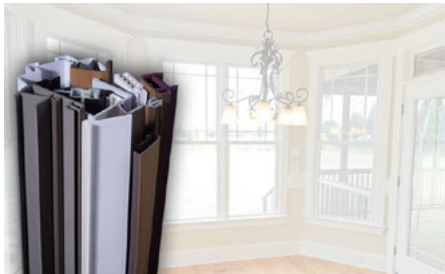

# THE NAME TO TRUST FOR PERFORMANCE IN PLASTIC

The experts at Astro Plastics combine modern technologies and materials with advanced design and precise controls, to prototype and produce better performing products for a range of applications. Check out some of the other markets Astro Plastics supplies with proprietary products from two U.S. plants, so you not only get the highest quality at a competitive price, you know they will be available and arrive on-time, every time.

## BUILDING MATERIALS

We began working with the door/window, millwork and fenestration markets over 50 years ago. We provide clients with everything from concept design to material choice, to production — our engineers are here to collaborate with you.

## LIGHTING

Astro Plastics designs and produces acrylic lenses for OEM Florescent and LED lighting. We work directly with material suppliers to develop formulations which optimize properties of optics, diffusion, and clarity, plus we ensure a precision fit with your fixture.

## ORIGINAL EQUIPMENT MANUFACTURING

Astro Plastics has historically addressed a wide variety of O.E.M. Applications. Contact Astro Plastics regarding your needs and we can help with your application.

## MARINE

Astro Plastics has developed innovative parts and accessories for several boat and personal watercraft manufacturers. We also offer a variety of products for boat trailers that improve functionality and reduce maintenance.

## POINT OF PURCHASE DISPLAYS

For expert help with your new or existing P.O.P. display or store fixture, contact the engineers at Astro Plastics. We'll work with you to design and produce components, or develop a total comprehensive solution to meet your requirements and budget.
